3M™ Cubitron™ II Abrasives

Seriously tough. Incredibly fast.

3M™ Cubitron™ II Fibre Disc 982C For carbon and mild steel.

- To be used with right angle grinders.
- 3M Precision Shaped Ceramic Grain maintains super-sharp points that cut exceptionally fast with less pressure.
- Disc life is significantly longer, completing more parts per disc and requiring fewer disc changes.
- These discs lasts up to two times longer than other ceramic abrasives- wears evenly, runs cool and optimizes mineral breakdown.
- Stiff fiber backing and a strong resin bond provide durability and tear-resistance for heavyweight applications such as high-pressure weld grinding and beveling.

3M™ Cubitron™ II Fibre Disc 987C For stainless and high-nickel alloys/soft metals such as aluminum. Antiloading characteristics to help it last longer on stainless and aluminum.

- To be used with right angle grinders.
- 3M Precision Shaped Ceramic Grain (PSG) maintains super-sharp points that cut exceptionally fast with less pressure.
- PSG runs cooler and disc life is significantly longer, completing more parts per disc and requiring fewer disc changes.
- Stiff fiber backing and a strong resin bond provide durability and tear-resistance for heavyweight applications such as high-pressure weld grinding or beveling.
- Grinding aid incorporated on the disc minimizes grinding temperatures for heat-sensitive alloys.

3M™ Cubitron™ II Cut-Off Wheel T1

**Save
Over 30%
off**

- Outstanding cutting performance on both mild steel and ultra high strength steel.
- 3M™ Cubitron™ II cuts 30% faster and lasts 2x longer than conventional ceramic abrasives.
- Precision Shaped Grain (PSG) technology employs microreplication for extremely uniform abrasive.
- Triangular Precision Shaped Grains are super-sharp and cut exceptionally fast.

3M™ Cubitron™ II Depressed Center Grinding Wheel T27

- 3M™ Cubitron™ II grinding wheel with precision-shaped grain engineered to cut faster than competitive ceramic products, offering significant productivity gains.
- Triangular shaped ceramic grain wears evenly, runs cool, and optimizes mineral breakdown for extra-long life.
- Rigid, reinforced resin-bonded wheel slices through almost all materials including stainless steel, mild steel, and aero space alloys.
- Abrasive wheel must have a maximum operating speed greater than or equal to the maximum speed of the power tool used.

3M™ Cubitron™ II Cut and Grind Wheel T27

- 3M™ Cubitron™ II Cut and Grind wheels are engineered with precision-shaped grain to cut faster than competitive ceramic products.
- Triangular shaped ceramic grain wears evenly, runs cool, and optimizes mineral breakdown for extra-long life
- Rigid, reinforced resin-bonded wheel is designed to be used both as a grinding wheel and as a cut-off wheel on both stainless and mild steel substrates.
